

Dear colleagues

After a decade of mismanagement and HIV denial it finally seems South Africa is undergoing the change we so desperately needed. The Department of Health and government will need all our support going forward, to repair our damaged health system - please read the attached press release and see where you can make a difference.

The Society pledges itself to helping improve our public and private health system however we can, in all the countries in this region. The 1st of December is a unique opportunity to pledge your support.

Regards

Dr WD Francois Venter, FCP (SA)
SA HIV Clinicians Society
