This workshop aims to bring together virologists, pharmacologists, pediatricians, obstetricians/gynecologists and other interested researchers to present and discuss the latest developments in the field of HIV Pediatrics, Drug Development, and Prevention of Mother to Child Transmission.

- *Rationale behind newly revised WHO pediatric antiretroviral treatment and prevention of mother to child transmission guidelines*
- *Prevention of mother to child transmission and program implementation*
- *Antiretroviral treatment of HIV in children, including adherence issues and managing children with treatment failure*
- *Co-infections in HIV-infected children, including vaccine-preventable diseases and immunization issues*
- *Complications of HIV infection in children, including metabolic and neurocognitive complications*
- *Adolescent HIV infection*
- *Interaction of nutrition and pediatric HIV infection and its treatment*
- *Psychosocial issues in pediatric HIV and families*
