5.1 Principles of ART Theory
5.1.1 ART Infographic
5.2 Adherence principles
5.3 Classes of ART
5.4 Side Effects of classes and individual drugs
5.5 Monitoring ART
5.6 Drug interactions
5.7 Principles of Resistance
5.8 Sequencing
5.9 Treatment Optimisation
5.10 New ARVs and Strategies
5.11 Dolutegravir in First-Line ART

Module 6: Reproductive Health
6.1 Overview
6.2 Contraception
6.3 Preconception
6.4 PMTCT (Preventing Mother To Child Transmission)

Module 7: Paediatrics
7.1 Review of PMTCT
7.2 Early Infant Diagnosis

7.3 Early initiation of HAART in infants and children
7.4 Paediatric TB
7.5 Prophylaxis & Vaccines
7.6 Adolescents - special issues

Module 8: Other Special Populations
8.1 Sensitisation
8.2 Key Populations

Module 9: Organ Systems
9.1 Neurology
9.1.1 HAND
9.1.2 Cryptococcal Meningitis
9.2 Respiratory (excludes TB)
9.3 Hepatology
9.4 Renal
9.5 Gastroenterology
9.6 Haematology
9.7 Dermatology
9.8 HIV & The Eye
9.8.1 Ophthalmology Activities
9.9 Other - Musculoskeletal / cardiology / endocrine

Module 10: Comorbidities and Ageing
10.1 Oncology
10.2 Diabetes
10.3 Hypertension Lipids Cardiac
10.4 Epilepsy
10.6 Psychiatry
10.7 Prophylaxis & Vaccines
10.7 Ageing

Module 11: TB
11.1 IRIS
11.2 TB Management

Module 12: Advanced Disease
12.1 Approach to the hospitalised patient
12.2 Palliative Care and End of Life Decisions

Module 13: Programmatic Evaluation
13.1 Quality Improvement (QI)
13.2 Differentiated Models of Care
13.3 The Hippocratic Oath in Practice
13.4 Stock Outs
